

Intelligent Support

Choose John Deere, and you have more than just the most intelligent application equipment available; you have the support of the network of John Deere Commercial Application Dealer and Application Support Dealerships across North America. Each Commercial Application Dealership has made a significant investment in the personnel, technical training and parts inventory necessary to support large-scale commercial applicators and producers. Dedicated sprayer technicians, full-time sprayer sales consultants, and Ag Management Solutions consultants are ready to answer your questions or keep your equipment in top-notch order. And each Commercial Application Dealer operates a fully-equipped mobile service unit, to respond to your need quickly and with a minimum of downtime. Intelligent application. Intelligent support. They're both as close as your John Deere Commercial Application Dealer.

JOHN DEERE Intelligent Application

Intelligence

runs in the family.

4930 Sprayer
1,200 gallons • 120 feet • 325 HP
Shown with new 300
cubic foot drybox

New 4730 Sprayer
800 gallons
100 feet
245 HP

New 4830 Sprayer
1000 gallons
100 feet • 275 HP

The smartest choice in application equipment just got smarter with the addition of the new 4830 Sprayer from John Deere. A full list of features and high-performance options, along with a 275-horsepower engine, 1,000-gallon solution capacity and boom widths available to 100 feet, gives farmers and commercial applicators the performance and versatility to take on the longest days and the toughest jobs.

The new 4830 incorporates all the field-proven features found on other John Deere sprayers. The standard GreenStar 2 monitor

comes pre-loaded with guidance, mapping, and variable-rate software. Optional BoomTrac Pro automatic boom leveling maintains a consistent boom height over the crop, while Swath Control Pro automatically turns individual nozzles on and off at turnrows, waterways, or other non-spray areas.

And if your operation requires more...or less...capacity? Choose any one of the John Deere family of sprayers. **The new 4730 Sprayer** gives you 800 gallons of solution capacity, up to 100 feet of boom width, and 245 horsepower, while the convertible 4930 covers

big ground with a 1,200-gallon solution tank, boom width to 120 feet, a 325-horsepower engine, and dry spinner boxes available in two sizes, including a new 300-cubic foot model. Both can spread two dry products simultaneously with the MultiApplier option.

But what sets John Deere application equipment apart is the support of the Commercial Application Dealership and Application Support Dealership. Each CAD has made a significant investment in the personnel, parts, equipment and training necessary to keep your sprayers rolling. So make the intelligent choice in application

equipment. See your John Deere Commercial Application Dealer or Application Support Dealer today for more information.
